C-TPAT/ASAP

Border crossings

Global Trade Solutions (GO Trade) and International [Resource Management](#) (IRM) present a new solution to assess, analyze and improve business partner compliance with the U.S. Customs and Border Protection C-TPAT program.

This new product, C-TPAT/ASAP, provides the parties involved in an importer's global supply chain with an easy-to-use, economical and timely means of determining compliance with the C-TPAT program as well as providing guidance on how to address whatever issues may be found. This offering addresses the increased vulnerability brought about by the fast-paced changes in business practices, technologies, relationships, threats and regulations. CTPAT ASAP provides importers and their business partners with a means to exceed the minimum security criteria through the communication of a coherent risk-based plan for their global supply chain security.
